**From:** CONTACT CENTER

**To:** Lin, Zhen

**Message Type:** Communication

**Priority:** Normal

**Date:** Friday, September 20, 2019 7:00 PM

**Subject:** Your Immunization Compliance Status

---

Dear Zhen Lin,

Your immunization records have been updated. Your current status for the university's immunization compliance requirements is detailed below:

**COMPLIANT WITH TUBERCULOSIS REQUIREMENT**

**COMPLIANT WITH MEASLES REQUIREMENT**

**COMPLIANT WITH MUMPS REQUIREMENT**

**COMPLIANT WITH VARICELLA REQUIREMENT**

If all requirements above are showing as COMPLIANT, no further action is necessary.

If there is a NON-COMPLIANT item in list above, the following may apply to you:

- **Blood test (titers) results:** If you have recently completed a laboratory blood test at the student health center, we will send you an updated message when the results are completed and processed.
- **Documentation needed:** If you have additional documentation, please submit a photo or scan of documentation [HERE \(Emflmmun.aspx\)](#).
- **Lab tests needed:** If lab tests are required to satisfy compliance requirements, they have been ordered for you. Please visit the laboratory at the Engemann Student Health Center (Room 140) or the Eric Cohen Student Health Center. If you need a T-Spot (for TB requirement), the lab test must be completed before 3pm.
- **Vaccination:** If you need a vaccination, please schedule an immunization visit appointment on MySHR or by calling the number below.

Due to the high volume of immunizations currently in progress, USC Student Health appointments for immunization completion are at capacity, so we are extending the timeframe for completion past the original September 13 deadline.

Please check your email so you remain informed, as incomplete immunization status may result in late fees or registration holds for the spring 2020 semester.

\*Note of fees: If you are on the USC Student Health Insurance plan, services for immunization compliance are covered by the Aetna Student Health Insurance. If you are not on the USC Student Health Insurance plan and opt for testing at the student health center, service fees will apply.

Sincerely,  
USC Student Health
